Background Information on NTP Peer-Review Panels: NTP panels are technical, scientific advisory bodies established on an “as needed” basis to provide independent scientific peer review and advise NTP on agents of public health concern, new/revised

toxicological test methods, or other issues. These panels help ensure transparent, unbiased, and scientifically rigorous input to the program for its use in making credible decisions about human hazard, setting research and testing priorities, and providing information to regulatory agencies about alternative methods for toxicity screening. DNTP welcomes nominations of scientific experts for upcoming panels. Scientists interested in serving on an NTP panel should provide their name and best form of contact to Camden Byrd by email: [NTP-Meetings@icf.com](mailto:NTP-Meetings@icf.com).

The authority for NTP panels is provided by 42 U.S.C. 217a; section 222 of the Public Health Service Act, as amended. The panel is governed by the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), which sets forth standards for the formation and use of advisory committees.

This peer review is being conducted by a panel via webcast. Peer-review of future draft reports will be conducted in accordance with Department of Health and Human Services peer-review policies (<https://aspe.hhs.gov/hhs-information-quality-peer-review>) and Office of Management and Budget's Final Information Quality Bulletin for Peer Review (70 FR 2664, January 4, 2005).

Dated: July 30, 2021.
